**Evaluation:**

<thead>
<tr>
<th>Question</th>
<th>Explanation / justification</th>

</table>
| Is it possible the proposed policy or activity or change in policy or activity could discriminate or unfairly disadvantage people? | The following aspects need to be taken into consideration regarding equality and inclusion:  
1. Ensuring that submission process is accessible to all  
2. Ensuring that the submission, peer review and awarding processes are free from unintentional bias  
3. Ensuring that the process enables rigorous assessment of the investment  
4. Identifying and addressing any potential barriers to attendance and participation by a diverse range of people  

Steps taken to address these issues include:  
- Ensuring that the submission process is easy and accessible, providing documentation in different formats,  
- Ensuring that panel membership is as diverse as possible and is representative of industry, academia and research institutes and institutional and regional representation.  
- ensuring that gender balance is sought in regards to panel membership  
- raising awareness of the potential for unconscious bias to impact on the decision making  
- ensuring that the format, duration and location of the assessment panel meeting are conducive to participation by a diverse range of people  
- ensuring that timetables and time allocation of pre-meeting tasks are sensitive to possible caring responsibilities (school holidays etc)  

In addition to the above, steps have been taken to minimise the potential impact of unconscious bias on the review. These include:  
- Unconscious bias included in the Chair’s brief.  
- Presentation and video link on unconscious bias added to Extranet which expert working group is directed to review.  
- Multiple points of reflection and analysis within the review process. |
