

European Partnering Awards

BBSRC's International Relations Unit (IRU) seeks to enhance BBSRC's influence and involvement at the forefront of international science, through taking advantage of international funding opportunities and capitalising on international links, both at policy and scientific levels.

European Partnering Awards provide resources to leading BBSRC-funded researchers and groups, so that they have the resources to establish long-term relationships with European scientists in areas of research that are of direct relevance to BBSRC's current scientific strategy.

The first annual call for the European Partnering Awards scheme was announced by BBSRC in 2013. Awards of up to £20,000, covering a 12 to 18-month period, have typically been awarded. Since 2013, BBSRC has funded 11 European Partnering Awards, providing a financial contribution of approximately £190K.

Funding from the European Partnering Awards can be used to support exchanges of personnel and to access facilities and workshops, although no prescribed mechanisms have been set concerning how the award should be used. However, priority is given to proposals that aim to provide exchange opportunities to early career researchers and access facilities and expertise not currently available in the UK.

The expectation is that European Partnering Awards will enable researchers to establish collaborations that will lead to the submission of joint research proposals, either through UKRI or other funding organisations, such as the European Framework Programme in the future.

A list of proposals that have been awarded by BBSRC since 2013 is shown below.
